Summary

Software Engineer with over 3 years of diverse experience, encompassing both frontend and backend development. Proficient in **NodeJS**, **TypeScript**, **React**, and **Go**. After spending the majority of my career focusing on frontend tasks, I recently transitioned to a backend role, finding it better aligned with my strengths and interests. Eager to further contribute and grow in backend development, where I believe I can deliver more impactful and effective results.

Employment

Pocket Network

[Florida, USA - Remote](#)

BACK-END ENGINEER

[May. 2023 - Present](#)

- Directed the engineering initiative to transition our **Go GraphQL** API to an enhanced v2 version, significantly enhancing our codebase's readability and streamlining team contributions.

Pocket Network

[Florida, USA - Remote](#)

FRONT-END ENGINEER

[Nov. 2021 - May. 2023](#)

- Led the integration of the web wallet with Ledger Nano S, Nano X, and Nano S Plus devices, enabling users to securely manage their funds without third-party reliance.
- Steered engineering efforts to introduce payments into the company's main product, establishing a crucial revenue stream.

Curbo Technologies

[Dominican Republic - Remote](#)

FULL-STACK ENGINEER

[Feb. 2020 - Nov. 2021](#)

- Enhanced website accessibility by integrating multi-language and multi-currency features.
- Devised a user-friendly interface and algorithm, empowering users to discover their ideal cars based on preferences.

Codemera

[Dominican Republic - Remote](#)

FULL-STACK ENGINEER

[Mar. 2020 - Oct. 2020](#)

- Collaborated with cross-functional teams to seamlessly migrate a comprehensive website from AngularJS to **React**, leveraging server-side rendering with Razzle.
- Crafted a front-end constructor tailored for e-commerce businesses.

Education and Certifications

Amazon Web Services Training and Certification ↗

[Online](#)

AWS DEVELOPER - ASSOCIATE CERTIFICATE

[Jun. 2023](#)

INTEC (Instituto Tecnológico de Santo Domingo) ↗

[Dominican Republic](#)

SOFTWARE ENGINEERING

[Aug. 2017 - Jan. 2021](#)

- GPA: 3.83.

Projects

Portal Platform Backend

[Go, Make, PostgreSQL, Docker](#)

- GraphQL API developed in **Go**, designed to power the portal-platform ensuring data persistence and enhancing service quality for users.

Portal Platform

[React, Remix, TypeScript](#)

GITHUB REPOSITORY ↗

- Decentralized access to Web3 infrastructure platform built with **Remix** and **TypeScript**.

Pocket Wallet

[React, StyledComponents](#)

GITHUB REPOSITORY ↗

- React** web application for creating and interacting with the Pocket Network blockchain wallet features.

Technical Skills

- **Languages:** Go, Javascript, TypeScript, NodeJS.

- **Tools:** Git, PostgreSQL, AWS (EC2, S3, Lambda, ECS, IAM, RDS, DynamoDB), Linux, Docker, Gqlgen, Make, Github Actions.
